EDUCATION

Vellore Institute Of Technology University

Bachelor of Technology in Computer Science, Minor in Cloud Computing

Bhopal, MP

Oct. 2023 – Ongoing

TECHNICAL SKILLS

Languages: C++, Java, Python, HTML/CSS

Frameworks: React, Node.js, Flask, Material-UI, FastAPI, Ollama

Developer Tools: Git, Docker, Microsoft Azure, Amazon Web Services, VS Code, Visual Studio, PyCharm, IntelliJ

Libraries: pandas, NumPy, Scikit-learn, Seaborn, Matplotlib

Certifications: Oracle Java Developer, AWS Cloud Practitioner, Bits And Bytes of Computer Networking

Courses: Data Structures, Object-Oriented Programming in C++, Fundamentals of AI and ML, Data Structure and Algorithms with C, Introduction to problem solving, Applied Numerical Methods, Python Programming

EXPERIENCE

Software Engineering Intern

Mahamai Hydro Power Pvt Ltd.

Mar. 2025 – May 2025

Gurugram, Haryana

- Developed and maintained internal web applications to streamline operational workflows, improving data accessibility and reducing manual reporting effort.
- Improved application performance and reliability by implementing logging, error handling, and basic CI/CD pipelines.
- Designed and optimized database schemas (MySQL/PostgreSQL) for storing plant performance, maintenance logs, and energy generation metrics.

RESEARCH PROJECTS

Paralinguistic Prompting With Human Intention Detection

Prof. Ram Kumar

June 2024 – Oct 2024

- Developed algorithms to detect human intentions by analyzing vocal cues—such as pitch, tone, and speech rate—using tools like Librosa and PyDub, advancing non-verbal communication analysis for more nuanced understanding of user emotions.
- Integrated RNNs and CNNs to merge paralinguistic audio features with visual data, significantly improving the accuracy of real-time emotion and intention detection systems for applications in customer service and virtual assistants.

PROJECTS

Sign Language Avatar System | *React.js, Ollama, Microsoft Azure*

Dec. 2025 – Ongoing

- Developed an accessible AI-powered communication platform for the deaf community, integrating Ollama for natural language processing and Microsoft Azure services for sign language translation and avatar rendering.
- Built interactive React-based frontend enabling users to input text prompts, leveraging Ollama's language models to process and interpret user queries before converting them into accurate sign language gestures.
- Integrated Microsoft Azure Cognitive Services for real-time text-to-sign language conversion, utilizing Azure's AI capabilities to ensure precise translation and natural gesture mapping.

College Event Management System | *React, MYSQL, Express, Node, Javascript*

June 2025 – July 2025

- Developed Unstop solution for efficient college event management, fostering competitiveness among clubs
- Implemented attendance system with MySQL database and admin-side blog posting functionality.
- Stored and displayed user feedback in MySQL for improved event analysis in admin view.
- Conducted sentiment analysis on feedback to generate club rankings, enhancing performance transparency

User Notifier | *React.js, Google Maps API*

Jan. 2025 – Feb. 2025

- Designed a real-time alert system to improve road safety and minimize traffic congestion using live data.
- Implemented user engagement features to deliver timely notifications, enhancing situational awareness and driver response.

POSITION OF RESPONSIBILITY

Team Lead, Project Exhibition 1,2

June 2025 – Ongoing

Vellore Institute Of Technolgy University

- Led end-to-end technical execution for multiple projects, including architecture design, development, and deployment workflows.
- Coordinated version control, task allocation, and code reviews while ensuring seamless team collaboration and integration.
