SUMMARY

Full-stack software engineer building scalable web applications using React, Node.js, Express.js, and PostgreSQL. Applies core fundamentals in C++, TypeScript, data structures, and backend architecture to deliver high-performance cloud solutions. Certified Oracle Java Developer recognized for securing a top 1.5% finish among 36,000+ competitors in the Myntra ScriptedByHer national hackathon.

EDUCATION

Vellore Institute of Technology University

B.Tech in Computer Science and Engineering

Sehore, Madhya Pradesh

August 2023 – May 2027

- **Coursework:** Applied Mathematics, Database Systems, Data Structures & Algorithms, Machine Learning, Cloud Computing, Software Engineering

PROFESSIONAL EXPERIENCE

Software Engineering Intern

March 2025 – May 2025

Mahamai Hydro Power Pvt. Ltd.

Gurugram, Haryana

- Engineered 20+ ETL specifications spanning 4 services, defining contracts and validation rules that removed drift between upstream and downstream systems
- Scaled regression-based forecasting algorithms in Python and profiled live tables to isolate bottlenecks, then applied index-level fixes that doubled query speeds
- Mentored 2 junior interns in deploying monitoring scripts to surface KPI baselines, accelerating issue resolution by 40% with automated triage alerts
- Collaborated with cross-functional engineering teams to translate business logic into storage-layer changes and API consumers, strengthening integrity at 5 facilities

PROJECTS

Acadence – AI Learning SaaS | Next.js, Supabase, Clerk | [GitHub](#) | [Live](#)

February 2025 – April 2025

- Managed the end-to-end project lifecycle of a real-time AI tutoring SaaS on Next.js App Router, eliminating the need for a separate REST API tier
- Configured Vapi's voice AI SDK for live conversational interactions, managing multi-state call logic and persisting session history to Supabase
- Established tiered subscription billing with Clerk, enabling plan-based access controls, and designed a PostgreSQL schema for companions and users

Dressly – E-Commerce Platform | Next.js, Node.js, Express, MongoDB | [GitHub](#) | [Live](#)

January 2025 – March 2025

- Directed the architecture of a customer-facing e-commerce application serving 500+ products using a modular Express/MongoDB backend separating routes and controllers
- Integrated JWT-based sign-in with Passport.js, building protected-route middleware and role-based authorization for buyer and admin access across 10+ endpoints
- Connected Stripe and PayPal SDKs for checkout, then delivered cart, wishlist, and order-tracking functionalities via a dedicated service module with Axios and SWR

Brain Tumor Detection | Lead Researcher | Python, scikit-learn, NumPy | [GitHub](#)

October 2024 – December 2024

- Led a 3-person research team through a full analytical workflow on 3,000+ medical records, managing data ingestion, modeling, and final evaluation
- Applied normalization and stratified splits with rigorous quality controls, achieving 90%+ held-out classifier accuracy

TECHNICAL SKILLS

Languages: C++, Python, Java, JavaScript, TypeScript, SQL, HTML/CSS

Frontend: React, Next.js, Tailwind CSS, Redux, SWR, Formik, Responsive Design

Backend: Node.js, Express, REST APIs, JWT, Passport.js, Server Actions, Webhooks

Databases & Cloud: MongoDB, PostgreSQL (Supabase), MySQL, AWS (EC2, IAM), Docker

Practices: Git, CI/CD, Pipeline Architecture, Statistical Modeling, EDA, Agile

ACHIEVEMENTS & CERTIFICATIONS

- **Myntra ScriptedBy Her 2026:** Secured 500th rank out of 36,000+ participants nationwide June 2026
- **Pupil, Codeforces:** Reached the upper 1,500 of 30,000+ users globally in competitive programming February 2026
- **Goldman Sachs Hackathon:** Finished 448th out of 40,000+ entrants nationally November 2025
- **ISRO Experiential Learning:** Selected for satellite imagery training at ISRO-NRSC Hyderabad October 2025
- **Oracle Certified Java Developer,** Oracle May 2025
