SUMMARY

Full-stack software engineer building scalable web applications with React, Next.js, Node.js, Express, and PostgreSQL, with strong fundamentals in C++, TypeScript, data structures, and backend architecture. Oracle Certified Java Developer; placed in the top 1.5% of 36,000+ competitors in the Myntra ScriptedByHer national hackathon.

EDUCATION

Vellore Institute of Technology University

Aug 2023 – May 2027

B.Tech. in Computer Science and Engineering

Sehore, Madhya Pradesh

- Coursework: Applied Mathematics, Database Systems, Data Structures & Algorithms, Machine Learning, Cloud Computing, Software Engineering

EXPERIENCE

Software Engineering Intern

Jul 2026 – Sep 2026

Commonwealth Bank

- Developed and enhanced a responsive customer-facing website, applying software engineering principles across structure, functionality, and user-focused design
- Applied financial-services cybersecurity concepts to identify security considerations for web applications handling sensitive data
- Designed and presented a web-hosting proposal, translating application requirements into a scalable deployment plan

Software Engineering Intern

Mar 2025 – May 2025

Mahamai Hydro Power Pvt. Ltd.

Gurugram, Haryana

- Designed 20+ ETL specifications across 4 services, standardizing data contracts and validation rules
- Optimized production databases and Python forecasting models, doubling query speed and cutting report latency by 50%
- Built monitoring scripts that cut issue-resolution time by 40% through KPI tracking and automated alerts

PROJECTS

OffPay – Offline Payments | *Node.js, Express, TypeScript, PostgreSQL, Next.js* | [GitHub](#) Apr 2026 – May 2026

- Engineered a full-stack payments system on a Node.js/Express/TypeScript backend and a Next.js/SWR dashboard, with PostgreSQL via Prisma for accounts and the settlement ledger
- Implemented hybrid RSA-2048/OAEP + AES-256-GCM payload encryption and a ciphertext-hash idempotency guard, verified with a Vitest suite that delivers one packet through 3 concurrent simulated nodes and asserts exactly one settlement
- Built a multi-user auth layer – signup/login, per-user payment PINs verified server-side before encryption, and optimistic-locked balance updates – with a dashboard visualizing live payment propagation

Brain Tumor Detection | *Lead Researcher* | *Python, scikit-learn, NumPy* | [GitHub](#) Feb 2026 – Mar 2026

- Led a 2-person research team through a full machine learning workflow on 3,000+ medical records, from ingestion to final model evaluation
- Achieved 90%+ held-out classifier accuracy by applying normalization and stratified splits with rigorous quality controls

Acadence – AI Learning SaaS | *Next.js, Supabase, Clerk* | [GitHub](#) | [Live](#) Oct 2025 – Nov 2025

- Delivered a real-time AI tutoring SaaS on Next.js App Router with Server Actions, eliminating a separate REST API tier and reducing backend code by 30%
- Implemented the Vapi voice AI SDK for live conversational sessions and modeled a PostgreSQL schema on Supabase for companions and users

TECHNICAL SKILLS

Languages: C++, Python, Java, JavaScript, TypeScript, SQL, HTML, CSS

Frontend: React, Next.js, Tailwind CSS, Redux, SWR, Formik, Responsive Design

Backend: Node.js, Express, REST APIs, JWT, Passport.js, Prisma, Server Actions, Webhooks

Databases & Cloud: PostgreSQL, MongoDB, Supabase, MySQL, AWS (EC2, IAM)

Practices: Git, Docker, Vitest/Jest, Agile

ACHIEVEMENTS & CERTIFICATIONS

Myntra ScriptedByHer 2026 – Ranked 500th among 36,000+ competitors nationally Jun 2026

Codeforces (Pupil) – Reached the top 1,500 of 30,000+ users globally in competitive programming Feb 2026

Goldman Sachs Hackathon – Finished 448th of 40,000+ entrants nationally Nov 2025

Oracle Certified Java Developer, Oracle May 2025
