

Ashly Agrawal

Kothri Kalan,
Bhopal - 466114,
Madhya Pradesh ,

Email: ashly.23bsa10117@vitbhopal.ac.in

Mobile: +91-8966003636

DOB: 21-06-2006

Gender: Female

Education

- VIT University** Bhopal, India
Bachelor of Technology - Computer Science Engineering with Gaming Tech; CGPA: 7.85 *Nov 23 - Present*

Research Projects

- Paralinguistic Prompting With Human Intention Detection** *Sept 2024 - Apr 2025*
Prof. Ram Kumar
 - Developed algorithms to detect human intentions by analyzing vocal cues—such as pitch, tone, and speech rate—using tools like Librosa and PyDub, advancing non-verbal communication analysis for more nuanced understanding of user emotions.
 - Integrated RNNs and CNNs to merge paralinguistic audio features with visual data, significantly improving the accuracy of real-time emotion and intention detection systems for applications in customer service and virtual assistants.

Skills Summary

- Languages and Libraries:** C++, Java, Python, numpy, pandas, scikit-learn, scipy, seaborn, matplotlib, Machine Learning
- Tools and Softwares:** Jupyter Notebook, MySQL

Coursework Information

Data Structures, Object-Oriented Programming in C++, Fundamentals of AI and ML, Data Structure and Algorithms with C, Introduction to problem solving, Applied Numerical Methods, Python Programming

Projects

- Moving Object Detection** *Jan 2025 - Apr 2025*
Self Project, Open CV - Computer Vision
 - Developed real-time computer vision pipeline to detect and track moving objects using OpenCV and deep learning.
 - Optimized motion tracking algorithms for accuracy, reducing false positives and improving object localization in dynamic scenes.
- Smart Agriculture** *Jan 2024 - Mar 2024*
Self Project, MYSQL, Django
 - Built a Django-based platform to monitor soil health and promote sustainable organic farming practices.
 - Integrated MySQL database for real-time analysis, enhancing crop planning and market access for farmers.
- User Notifier** *October 2024*
Self Project, React.js , Google Maps API
 - Designed a real-time alert system to improve road safety and minimize traffic congestion using live data.
 - Implemented user engagement features to deliver timely notifications, enhancing situational awareness and driver response.

Workshops

- Girlsript Summer Of Code 2024:** *August 2024*
 - Developed a responsive web page to display pet news, utilizing HTML, CSS, and JavaScript, while integrating a news API for dynamic content delivery and implementing styled components for enhanced user experience.
 - Designed and implemented responsive web components for the UMatteer platform, utilizing HTML, CSS, and JavaScript to create an engaging user interface, including a dynamic services page and a blog section fetching content via API integration.

Position of Responsibility

- Technical Team Lead, Project Exhibition-1,2** *Aug 2024 - Apr 2025*
VIT BHOPAL
 - Led end-to-end technical execution for multiple projects, including architecture design, development, and deployment workflows.
 - Coordinated version control, task allocation, and code reviews while ensuring seamless team collaboration and integration.
