SUMMARY

Full-stack software engineer building scalable web applications using React, Node.js, Express.js, and PostgreSQL. Applies core fundamentals in C++, TypeScript, data structures, and backend architecture to deliver high-performance cloud solutions. Certified Oracle Java Developer recognized for securing a top 1.5hackathon

EDUCATION

Vellore Institute of Technology University

Sehore, Madhya Pradesh

B.Tech in Computer Science and Engineering

Aug 2023 – May 2027

- Relevant Coursework: Applied Mathematics, Database Systems, Data Structures & Algorithms, Machine Learning, Cloud Computing, Software Engineering

PROFESSIONAL EXPERIENCE

Software Engineering Intern

Mar 2025 – May 2025

Mahamai Hydro Power Pvt. Ltd.

Gurugram, Haryana

- Architected 20+ ETL specifications across 4 services, defining data contracts and validation rules that eliminated drift between upstream and downstream systems
- Modernized production database tables and created regression-based forecasting models in Python, doubling query speed and cutting report latency by 50%
- Cut issue resolution time by 40% by deploying monitoring scripts that surfaced KPI baselines and triggered triage alerts for recurring failures
- Refactored storage-layer logic and API contracts through cross-functional collaboration, strengthening data integrity spanning 5 facilities

PROJECTS

Brain Tumor Detection | Lead Researcher | Python, scikit-learn, NumPy | [GitHub](#)

feb 2026 – March 2026

- Led a 2-person research team through a full machine learning workflow on 3,000+ medical records, from ingestion to final model evaluation
- Achieved 90%+ held-out classifier accuracy by applying normalization and stratified splits with rigorous quality controls

Acadence – AI Learning SaaS | Next.js, Supabase, Clerk | [GitHub](#) | [Live](#)

oct 2025 – Nov 2025

- Delivered a real-time AI tutoring SaaS on Next.js App Router with Server Actions, eliminating a separate REST API tier and reducing backend code by 30%
- Implemented the Vapi voice AI SDK for live conversational sessions, managing multi-state call logic and persisting 100% of session history to Supabase
- Designed tiered subscription billing with Clerk for plan-based access control and modeled a PostgreSQL schema for companions and users

Dressly – E-Commerce Platform | Next.js, Node.js, Express, MongoDB | [GitHub](#) | [Live](#)

Feb 2024 – Mar 2024

- Launched a customer-facing e-commerce platform serving 500+ products on a modular Express/MongoDB backend that separates routes and controllers
- Secured the platform with JWT authentication via Passport.js, adding protected-route middleware and role-based authorization for 10+ API endpoints
- Streamlined checkout with Stripe and PayPal SDKs, and shipped cart, wishlist, and order-tracking features via a dedicated service module using Axios and SWR

TECHNICAL SKILLS

Languages: C++, Python, Java, JavaScript, TypeScript, SQL, HTML, CSS

Frontend: React, Next.js, Tailwind CSS, Redux, SWR, Formik, Responsive Design

Backend: Node.js, Express, REST APIs, JWT, Passport.js, Server Actions, Webhooks

Databases & Cloud: MongoDB, PostgreSQL, Supabase, MySQL, AWS (EC2, IAM)

Practices: Git

ACHIEVEMENTS & CERTIFICATIONS

Myntra ScriptedByHer 2026 – Ranked 500th among 36,000+ competitors nationally

Jun 2026

Codeforces (Pupil) – Reached the top 1,500 of 30,000+ users globally in competitive programming

Feb 2026

Goldman Sachs Hackathon – Finished 448th of 40,000+ entrants nationally

Nov 2025

Oracle Certified Java Developer, Oracle

May 2025
